MOHAVE COMMUNITY COLLEGE
2017 STRATEGIC VISION OUTCOMES REPORT
In 2017 Arizona’s community colleges embraced a Strategic Vision for 2030, which focuses college efforts around three major goals: expanding access to postsecondary credentials; increasing transfer and completion of associate degrees and certificates; and improving alignment between college programs and workforce needs.

The Strategic Vision for 2030 builds upon the colleges’ previous long-term plan, published in 2011, and outlines how Arizona’s ten community college districts will continue to improve student outcomes, as well as how the districts contribute to Arizona’s broader economic and educational goals. In particular, the Strategic Vision for 2030 creates a framework for reaching the Achieve60AZ goal that by 2030, 60% of the Arizona working population will hold a postsecondary credential.

A major function of the Strategic Vision for 2030 is the collection, analysis, and publication of data pertaining to 34 short-term, mid-range, long-term, and follow-up metrics. Although this report contains several metrics that are new in 2017, most have been in place for years, making it possible to evaluate trends in student progress and outcomes.

Statewide and district-level data will continue to be used to guide improvement efforts at community colleges across the state. Statewide data will also be shared with the Arizona Board of Regents, the Arizona Department of Education, and Arizona’s workforce development and business communities in order to assist in the improvement of educational and economic pathways.

The Strategic Vision for 2030, as well as a Technical Guide that provides detailed definitions of each metric, can be found online at: www.arizonacommunitycolleges.org.
METRICS AND COHORTS

METRICS

The 2017 Strategic Vision Outcomes Report presents data related to 34 short-term, mid-range, long-term, and follow-up metrics. These data identify areas of strength, as well as places where Mohave Community College (MCC) will need to focus its efforts in order to expand access, increase transfer and completion, and improve alignment with workforce needs.

**Short-term metrics** correspond to enrollment rates, cost measures, and training for high-demand occupations.

**Mid-range metrics** examine student persistence and success in the first two years of college.

**Long-term metrics** pertain to transfer and completion rates.

**Follow-up metrics** examine student success after departing the community college and may be affected by economic forces, as well as the actions of Arizona universities.

COHORTS

The 2017 Strategic Vision Outcomes Report tracks several cohorts of students.

**2014 and 2010 New Student Cohorts** are used to examine student persistence and success after two and six years, respectively.

**2014 and 2010 Credential-Seeking Sub-Cohorts**, defined as cohort members who earned at least 12 credits by the end of their second year, are used for some retention, transfer, and completion measures. Credential-seeking sub-cohorts provide a more accurate gauge of student success, as they take into account learners’ diverse education and training goals.

**2013-14 Occupational Cohort**, comprised of students who exited MCC in 2013-14 after completing a specified number of credits in an occupational pathway, is used in follow-up metrics related to wage growth and earning industry-recognized credentials.
Total annual enrollment at MCC has declined from its high in 2010-11, and full-time student equivalent (FTSE) enrollment has diminished commensurately. This enrollment decline mirrors statewide and national trends and reflects a greater number of students enrolling in universities and/or remaining in the workforce.

At MCC, total annual enrollment in Adult Basic Education (ABE) and/or General Educational Development (GED) courses reached 486 in 2015-16. Total annual enrollment of high school learners in dual credit courses reached 846 in 2015-16. These programs are essential in expanding access to Arizona’s community colleges.
Since 2010-11, the percentage of MCC students who are members of an underserved racial/ethnic group has increased substantially and now exceeds the percentage of the Mohave County population belonging to an underserved minority group (21%).

MCC enrolls more adult learners and Pell recipients than statewide averages (36% and 30%, respectively).

At MCC, only 37% of instruction in 2015-16 occurred in traditional semester-length courses held on campus Monday through Friday, 8am to 5pm. Extending access to many diverse populations, 63% of all student credit hours were earned online, at night or on the weekends, or at skills centers, American Indian reservations, or other locales.
MCC enrolls a higher percentage (35%) of recent high school graduates than the national average (25%).² This rate mirrors the statewide average (35%). MCC will continue to work with other community colleges and the Arizona Board of regents to improve college-going across the state.

At just over $8,000 per year, the net price of attending MCC is just 19% of the Mohave County median household income. This rate is substantially lower than Arizona’s public universities (26-31%),³ making MCC an excellent and affordable option for postsecondary education and training.
Over two years, 69% of student credit hours attempted in developmental English or reading by MCC’s 2014 New Student Cohort were successfully completed (with a grade of A, B, C, or Pass). In that same time period, 57% of student credit hours attempted in developmental math by the same cohort were successfully completed (with a grade of A, B, C, or Pass).

After six years, 30% of developmental English or reading learners in MCC’s 2010 New Student Cohort successfully completed a college-level course in English, and 20% of developmental math learners in the same cohort completed a college-level math course. These success after developmental education rates are somewhat lower than statewide and national averages.⁴
In 2015-16, between 71% and 86% of student credit hours attempted in College Algebra, English Composition I and II, and Speech were successfully completed (with a grade of A, B, C, or Pass). The rates at which MCC students successfully complete these first college-level courses are higher than the corresponding statewide and national averages.⁵

Over two years, 75% of student credit hours attempted in college-level courses by MCC’s 2014 New Student Cohort were successfully completed (with a grade of A, B, C, or Pass). This rate is similar to the statewide average (80%).

Metric 13: College-Level Course Success Rate

Metric 14: Percent of First College-Level Math and English Credit Hours Completed
By the end of their second year, 49% of part-time learners in MCC’s 2014 Credential-Seeking Cohort had completed 24 credits, and 30% of full-time learners in the same cohort had completed 42 credits. These rates are notable, as research has linked attainment of credit thresholds to higher persistence and completion rates.⁶

Ninety-three percent of MCC’s 2014 Credential-Seeking Cohort (excluding those who transferred and/or earned a degree or certificate) persisted to spring 2015, and 72% of them returned the following fall. MCC’s retention rates are substantially higher than the 53%⁷ reported as a national comparison, in part because the national figure is not limited to credential-seekers.
Despite a decline between 2012 and 2015, in 2016 the number of degrees and certificates awarded by MCC increased by 23% to 897. Of the 2016 total, half were degrees and half were certificates. These data reflect a concerted effort by MCC to increase the number of learners earning postsecondary credentials. After six years, 29% of MCC’s 2010 Credential-Seeking Cohort had completed a degree or certificate. MCC’s graduation rate is similar to the statewide average and is higher than the most recent national comparison (25%),² in part because the national number is not limited to credential-seekers.
In 2015-16, MCC awarded 171 Arizona General Education Curriculum (AGEC) certificates. The AGEC is comprised of 35-37 credit hours of coursework that, upon completion, transfer to all public colleges and universities in the state and fulfill lower division, general education requirements.

Eight percent of MCC’s 2010 Credential-Seeking Cohort completed an AGEC within 6 years. Increasing the AGEC completion rate—a key priority for the state’s community colleges—will not only ease transfer to Arizona’s public universities but also help students earn bachelor’s degrees in less time and with fewer excess credits.⁸
Between 2010 and 2016, the number of students transferring from MCC to an in-state, public university increased by 22% to 169, despite declining enrollments. In addition, the percentage of transfers who earned an AGEC and/or degree prior to transferring remains high, indicating that the transfer process is relatively efficient and cost effective.

At MCC, transfer rates to public universities among ASSIST Transfer Behavior Cohorts have increased to 21% while the overall transfer rate (the percent of learners in credential-seeking cohorts who transfer to any four-year college or university within 6 years) has been variable. Both rates are slightly lower than the most recent national average (25%).

9
At MCC, 61% of learners in the 2010 Credential-Seeking Cohort achieved a successful outcome within 6 years. Because community college learners enter college with diverse education and training goals, and because they often attend part-time and/or earn credits from more than one institution, several national accountability initiatives—including the Student Achievement Measure—have broadened the definition of a successful outcome to include earning a degree or certificate, transferring to another two- or four-year college or university, or continued enrollment. Nationally, 63% of full-time students and 60% percent of part-time students achieve one of these successful outcomes within 6 years.¹⁰
Fifty-eight percent of 2012-13 full-time transfers from MCC to in-state, public universities earned a bachelor’s degree within four years. This rate is slightly lower than the statewide rate but indicates that most full-time transfers are graduating from the state’s public universities in a timely manner.

Thirty-seven percent of 2012-13 transfers from MCC to all four-year institutions—public and private, in-state and out—earned a bachelor’s degree within four years. This rate is lower than both the statewide figure (47%) and the national average (60%),¹¹ and may reflect a high incidence of part-time attendance after transfer.
In 2016, an estimated 43.7% of the Arizona working-age population (residents aged 25-64) held a workforce certificate, associate degree, or bachelor’s or higher degree (up from 41.8% in 2014). Arizona’s community colleges are working closely with the Arizona Board of Regents and other postsecondary institutions across the state to reach the Achieve60AZ goal that by 2030, 60% of the Arizona working-age population will hold a postsecondary credential.
Metric 31: FTSE Enrollment in Occupational Courses

Metric 32: Percent of Highest-Demand Occupations for Which Community Colleges Offer Degree/Certificate Programs

Metric 33: Wage Growth of Occupational Learners

These three metrics are in development and will be incorporated into the Strategic Vision in 2018.

Of all learners in MCC’s 2013-14 Occupational Cohort who took a technical skill or end-of-program assessment up to one year after college exit, 86% passed the assessment and/or earned an industry-recognized credential. Examples of occupational programs leading to industry-recognized credentials include nursing, EMT, construction, solar technologies, and fire science.
Strategic Vision Data: Sources and Attributions
