Dear MCC Community,

The IT team has been working to update our endpoint protection for viruses and malware. The most recent update requires a restart of your computer so that we can push new security, virus, and malware policies to your system.

Please make sure that you restart your system in the next day or two - it doesn't matter when you do so if the computer restarts completely - logging off and back onto the system will **NOT** update your computer. It **MUST** be a complete reboot or shut down. The simplest way to accomplish this task is to shut down your computer at the end of the workday so that it will update when you turn it on in the morning.

If you have any questions or concerns please feel free to reach out to me directly, or contact Angie Neth at aneth@Mohave.edu.

Kind Regards,  
Mark Van Pelt
