

Glean Note Taking

Glean is an interactive note taking app, built in with many awesome features! Upon downloading, it brings you through a tutorial process teaching the user how the applications function.

You can record your own voice or the professors lecture, highlighting certain parts for review (without pausing the recording) as well as marking elements of the lecture or note taking as "important" to refer to later on. It has Wikipedia built into it so you can easily search a definition or add a visual element to your notes with ease!

Glean offers a [Zoom Tutorial](#) service to better learn how to best take notes using this great service! It will also walk you through lessons on better note taking and why note taking is vital to your success!

If you don't have time to attend one of the available session dates - no worries. [There's a link available to download the slides!](#)
