

## Information for Parents of Potential Dual Enrollment Students

During their child's junior and senior years of high school, many parents find themselves wondering, "How am I going to afford a college education for my son or daughter?" At Mohave Community College, we can help answer this question through a very special program created by the Arizona Legislature called "Dual Enrollment."

### What is Dual Enrollment?

The Dual Enrollment Program at Mohave Community College provides eligible high school juniors and seniors the opportunity to earn both high school and college credit at the same time. In other words, eligible students can take one or more college-level courses which will count toward both high school graduation credit and as college credit.

### How does Dual Enrollment help me afford a college education for my son or daughter?

Students enrolled in Dual Enrollment courses pay no college tuition for those courses.

Additionally, textbooks are free for all public school Dual Enrollment students. That's right! The Dual Enrollment courses at Mohave Community College are absolutely free for any eligible high school student, and the student who successfully completes one or more Dual Enrollment course will receive both high school credits for graduation and college credits.

Most dual enrollment courses offering college-level credit will transfer to our state-funded universities or community colleges in Arizona, to most private colleges and universities in the state, and to many out-of-state institutions of higher learning. This means your son or daughter will have a head start on the courses he or she will need in the pursuit of a degree – providing you with significant savings.

For example, if your son or daughter completed the two core English course required by all state universities and community colleges as a Dual Enrollment student, the savings to your family would be approximately \$500 at a community college and more than \$700 at a state university.

### Where are Dual Enrollment Courses offered by Mohave Community College?

Mohave Community College offers Dual Enrollment courses on most high school campuses in Mohave County.

### What are the requirements to enroll in a Dual Enrollment Course?

Dual Enrollment students must:

- 1) Be classified as a high school junior or senior.
- 2) Have appropriate SAT or ACT scores.
- 3) Be a degree seeking student.
- 4) Have the approval of the high school's principal and counselors.

### How does my son or daughter enroll in one or more Dual Enrollment courses?

The process for enrollment is simple. Just visit a counselor on a high school campus to check eligibility and complete a Dual Enrollment Application packet.
