

**RFQ 3-1718
Welding Booths and Fume Extraction Systems**

Photos and Additional Information

January 11, 2018

Welding booths

Brand is not important. Booths will be aligned side by side along one wall. Booths should be fully open with the capability to hang curtains. Back and side walls must be solid enough to add/hang accessories and maintain the integrity of the wall.

Welding curtains with installation hardware should be included as a part of this quote.

Welding tables should not be included as a part of this quote.

Fume extraction

Brand is not important. Extraction should be mountable overhead due to floor space restrictions. Extraction must be self-contained with no external venting required. Dual arm extraction potential is highly preferred. Extraction arm must have flexible user positioning capability. Filters should be included in the quote.
